PREFACE

This is the third edition of Office Manual Part-IV. The second edition was published in 1972 (superceding the 1931 edition of "office Manual Part-IV, 'Military Pension Accounts').

2. This Manual contains detailed procedure of work done in the office of PCDA(P) Allahabad, for the grant, audit and accounting of pension/family pension in respect of Commissioned officer, PBOR, Defence civilians and their dependants. The specific function of different sections of PCDA(P)'s are covered in the following volumes of this Manual.

Vol-I	Administration, Records, Accounts, PPO, O & M Cell, Legal Cell, Hindi Cell, Post Audit, EDP Centre and Pension Adalat Cell
Vol-II	Grants (Civil) in respect Defence civilians
Vol-III	Grants (Military) in respect of Commissioned Officers.
Vol-IV	Grants (PBOR)
Vol-V	Audit

3. A series of major changes have taken place in the pension procedures since 1972 i.e. year of publication of the second edition. A large number of provisions made in these volumes have become obsolete and redundant due to frequent amendment of Rules, Government decisions in implementation of the successive Pay Commissions and extensive computerization of pension work. A need was, therefore, felt to review and update this Manual with reference to various Government orders, instructions, rulings, interpretations and clarifications etc. issued over past 30 years which are scattered over a number of letters, communiqué, memoranda etc.

4. An attempt has been made to update this manual by incorporating the latest Government orders, instructions and clarifications. The existing Government orders which are still operative and which are not easily available, have also been accommodated in this Manual.

5. References to the relevant Regulations/Instructions/Orders etc. obtaining on the army side only have been mentioned in this manual. In dealing with case of personnel serving with the Navy and Air Force units/formations corresponding orders obtaining on Navy/Air Force side may please be referred to.

6. The instructions in the Manual are supplementary to the Rules in the Civil and Defence Audit and Accounts Code, Civil Service Regulations, CCS(P) Rules 1972, Pension and Financial Regulations etc. These are intended to serve as a guide to those employed on the work relating to the pension and should not be quoted in correspondences with officers outside the Defence Accounts Department.

7. Nothing in this Manual will be held to supercede any rule or orders of the Government of India with which it may be at variance.
8. Any addition or alterations which may be necessary to this manual will be notified periodically by the PCDA (P) Allahabad with the prior approval of Controller General of Defence Accounts.
9. I hope that with the help of this manual the work and functions of the office of the PCDA (P) will be better understood and followed to save time and effort in disposal of cases. Ignorance of provisions will not be accepted as an excuse for any departure from the rules or failure to comply with them

Budget Estimates

- 35.** There will be a separate cell in this Section for dealing with the work relating to the preparation and submission of budget forecast and revised estimates under non-effective heads and all work in connection therewith.
- 36.** The estimates under Major Head LXIII/82 Defence Services Non-effective and under Major Head 65 in so far as Defence Accounts Department personnel are concerned, will be prepared in accordance with the instructions laid down in Para 159, Defence Account Code (1994 edition).
- 37.** Pension Budget is prepared in two parts separately and covers the following categories of pensioners:

Defence Pension Budget Rendered -> Ministry of Defence -> Through CGDA
 Civil Pension Budget Rendered -> CPAO -> Through CGDA

System of Budget preparation

- 38.** Defence Pension Budget is prepared by PCDA (Pensions) based on
- (i) last year's expenditure and increases during preceding years other than for commutation and gratuity, where actual data is taken into account,
 - (ii) computerised data for determining the expected outgo, instead of incremental budget,

- (iii) impact of new Government orders, affecting the entitlement of pensionary awards, is taken into account,
 - (iv) estimates are obtained from other Controllers for gratuity and leave encashment and
 - (v) approximate assessment of retirement of various categories of pensioners and normal wastages are also taken into account.
- 39.** The last year's actuals other than commutation and gratuity are taken as base for preparation of pension budget for the current year. However, the arrears for the previous year on account of revision of pension are deducted, retaining the payments for 12 months in respect of pension and family pension.
- 40.** The information regarding fresh induction of pensioners is taken with reference to the pension cases notified during 5 to 6 months in the current year. This forms the basis to estimate the approximate number of pensioners likely to retire during the current year. The PPOs notified manually are also added to make the figure more realistic.
- 41.** The following methodology is adopted for calculation of pension gratuity, commutation and relief in respect of the above pensioners
- (i) The financial impact for half of the retirees are taken for calculation as the individual retiring on 1st April will draw pension for 12 months and the individual retiring on 1st March will draw pension for 1 month only. Hence 6 months average is taken for calculation of pension and family pension. For calculation of these estimates, the pension granted to Lt. Col., UDC and Havildar of 'Y' category respectively in respect of commissioned officers, civilians and PBOR are taken as mean for calculation.
 - (ii) The relief is calculated on the gross pension, whereas net pension is added in the estimate. The relief already granted previously is deducted from the total pension estimate to arrive at the amount of net pension. The amount of commuted portion of pension is added in net pension to arrive at original basic pension for calculation of relief.
 - (iii) The amount of gratuity and commutation is calculated based on computerised data for estimated no. of pensioners including the cases notified manually per pensioner entitlement is calculated and the total amount is determined after multiplying the projected number of retirees during the year separately for commissioned officers, civilians and PBOR.
 - (iv) The new Government orders issued during the currency of the year are taken into account for preparation of estimate. The financial impact is taken on the basis of estimated no. of pension cases likely to be revised during the currency of one year and also likely payment expected to be made by the pension disbursing authorities.
 - (v) The amount on account of restoration of pension, restored after lapse of 15 years from the date of retirement/recovery, whichever is later, is also added to the estimate.
 - (vi) The likely normal wastage due to death, etc. at the estimated rate of 2.5% (approx) is reduced from the pension / family pension estimate.
 - (vii) These estimates are increased / decreased at the time of preparation of revised estimate on the basis of actual debits being received from the pension disbursing authorities and the trend of retirees during the year.

42. The budget estimates are prepared through the following stages:-

(i) Preliminary revised estimate:

The actual expenditure under each head of accounts upto September are taken into account from the printed compilation received from the EDP Centre keeping in view of the initial provisions and the trend of expenditure upto September. The figures against each head of accounts are increased and decreased in the preliminary revised estimate. The financial impact involved due to issue of Government orders are also added.

Revised Estimates

Revised estimates is the revision of the figures of preliminary revised estimates of the current year and final allotment. The expenditure upto October as per printed compilation are taken into account and the figures in revised estimates are increased or decreased as per trend of expenditure. The financial impact involved due to issue of government orders are also added.

(iii) Modified Appropriations

Modified Appropriations are prepared based on the actual expenditure head of account-wise upto January of the current year as per printed compilation.

(iv) Appropriation Accounts

It is the final set of the budget. The expenditure against each head of account booked as per printed compilation upto March Supplementary Correction are taken into account and reflected in the Appropriation Account to be submitted in July of each year. The reasons of variations between the final allotment and actual expenditure are critically explained and action to regularize, if any, are taken.

Monitoring of Pension Budget

43. In order to avoid excess expenditure against the budgetary allotment, a close monitoring of the pension budget is carried out as under:-

- (i) through all India RDR Head compilation.
- (ii) monthly reports of the amounts booked to various pension heads from CDA (PD) Meerut and CDA Chennai.
- (iii) monthly report of the amounts booked to various pension heads by all other Controllers.
- (iv) through weekly report, obtained from Controllers at the close of the financial year.
- (v) through monitoring register by PCDA (P) / CDA (P) on weekly basis.
- (vi) fortnightly report of MIS showing allotment under various pension heads and expenditure incurred against each head as also debits received from RBI, CAS, Nagpur and the scrolls / vouchers received from the banks / treasuries.

Submission of Budget Estimates

44. The parties to whom and the dates by which the various estimates for Non-Effective Heads will be dispatched by this Section are indicated in Para 198, Defence Account Code (Revised edition 1994) and Para 532, Defence Audit Code (Revised edition 1992) .
